STYLE

Fit-Reform styles are creations. They express the trend of fashion in an authoritative way. They reflect what is absolutely new, and still keep within the bounds of good taste.

One of the very nice things about Fit-Reform Suits and Overcoats is their certainty of correctness. They are always right, in style as well as in quality and tailoring.

Growing

ROSE QUESNEL

Native Canadian Tobacco

Planting Canadian Tobacco.

Molson, the pioneer of steam navigation in Canada, would marvel at the modern trans-oceanic Steamship in the same degree that the pioneer tobacco planter would be astonished over the present methods used by up-to-date tobacco growers in certain districts of the Province of Quebec. The selection of seed, the preparation and sterilization of the seed-bed to kill out weed seeds, rotation of the crops, etc., are so many operations which the scientific tobacco planter has to attend to, even before the tobacco plant leaves the hot-bed.

Early in June, the plants are ready to be transfered to the field. A special machine, shown above, operated by two men, seated low down, makes holes in each hillock, places therein the delicate plants, presses earth gently round the roots, waters them and banks earth around them better and quicker than if done by human hands.

The young plant, planted in sterilized soil, consisting of the most unctuous native earth, enriched with hard-wood ashes and other fertilizers, is now ready for its second growth and development. All planters in the Province do not follow this scientific system of culture, but those who do are well repaid for their trouble, as most of their output is bought by us at a premium and goes in the manufacture of

ROSE QUESNEL
Smoking Tobacco
MILD AND NATURAL

the best Natural Smoking Tobacco on the market, a tobacco of distinctive, delightful fragrance and aroma, smooth and cool and free from bite or sting.

At all dealers.

ROSE QUESNEL Tobacco is the product of the choicest natural native leaf, properly grown, dried and cured and guaranteed free from artificial flavoring and "liquoring."

It is all tobacco and nothing but tobacco.

The Rock City Tobacco Co. Limited

"BUSTER" REID ON THE FIRST "TANK" USED IN BRITISH SOMME OFFENSIVE.

Special to McGill Daily.

LONDON, Ont., Oct. 30.—George M. Reid, of this city, has received word from his son, Lieut. G. Eric Reid, a graduate of McGill University, and well known as a football player, that he was one of the Canadians chosen to man the first "tank" used in the Somme offensive of September. Lieut. Reid is now assistant adjutant of the 3rd Canadian Battalion.

"Buster" Reid was one of the best known men about the University while a student in the Faculty of Arts. He was playing in the scrimmage of Frank Shaughnessy's 1914 intercollegiate team when he enlisted in the ranks of the 23rd Westmount Rifles, under Lt.-Col. Fisher. He rapidly rose to the rank of sergeant, and went overseas as a lieutenant. In England, after a brief period of training, "Buster" was transferred to the 3rd Battalion on the front, a unit with which he has since been connected. He has been twice wounded, and has been mentioned in despatches for gallant work, being also recommended for a decoration. After being on leave to Canada last spring owing to an injured hand, he rejoined his battalion this autumn. He has lost the use of one hand.

LIEUT. HOWELL, GALLANT FLIER WINS THE M. C.

Former McGill Man Rewarded for Good Work.

IN PERIL IN THE AIR.

With His Pilot Dead Among the Steering Gear, Saved Life and Machine.

For extricating himself and his machine from a particularly difficult situation while flying over the German lines in France, Lieut. J. G. Howell, a past student of the class of Arts '12, and later employed in an insurance office in the city, has received the Military Cross, according to word which has reached a friend at the University. The incident for which Lieut. Howell has been decorated took place on May 11 last. Accompanied by his flight commander, he and others went aloft to record the results of British big-gun shooting on the German position. These were signalled by them to the British artillery staff. In the middle of their work the British aviators were peppered by the enemy's anti-aircraft guns. A piece of shrapnel struck the pilot of Lieut. Howell's machine in the head, killing him instantly. With great presence of mind, the former McGill man immediately took charge of the steering, made difficult by the fact that the dead pilot's feet were firmly fixed in the rudder. By causing the machine to descend by circle movements, Lieut. Howell overcame the difficulty and after passing over the German trenches three times, managed to land on the breast of a communication trench some 150 yards behind the first British line trenches. Though thrown out of his machine, Lieut. Howell received no injuries.

Lieut. Howell has had a number of other experiences since he entered the Royal Flying Corps. When war broke out he went to England from Montreal and secured a commission in the Royal Field Artillery on November 23, 1914. On September 25, 1915, Lieut. Howell left for the French front, where he served on the staff as brigade officer to the 113th Brigade, Royal Field Artillery, until March 10 last, being then attached to the Royal Flying Corps as an observer.

Lieut. Howell's first flight was made two days after he received his transfer. On Good Friday last he had quite an amusing trip. His machine was one of two which went scouring the air in search of the enemy's aircraft. The two had only just started and got over the enemy's lines when at an altitude of 4,000 feet they discerned an enemy 'plane 500 feet below them. The British pilots, losing no time, dropped down on either side of the enemy aeroplane, which made off at 105 miles an hour, showing the white feather properly. The British aviators pursued the German craft four miles within enemy territory, but it managed to get clear.

On the first Sunday after Easter, Lieut. Howell, along with his pilot, went aloft as an escort to other British machines. Their type of machine had advantages the other machines did not possess. Lieut. Howell's machine was soon attacked by a Fokker and over the enemy's line, made for it twice. In the battle which ensued, and which ended in the German making for his home hangar, 20 bullet holes were made in Lieut. Howell's machine and two of these were in the propeller.

Lieut. Howell is the son of Mr. and Mrs. E. Howell, Penbigwrn, Wales, and the grandson of the late Colonel Howell, of the 8th King's Regiment.

1918 ANNUAL BOARD MEET.

There will be a meeting of all the members of the 1918 Annual Board at the R. V. C. Tuesday evening at 8 p.m. All those who have been elected from the various faculties as representatives, are requested to attend, as the production or non-production of the Annual will be discussed, as well as the election of editors and managers if it is decided to print the Annual this year.

OFFICIAL ANNOUNCEMENT.

Official announcement of the death of Sapper E. Merrill Desbrisay, Sci. '16, reported some days ago, is made in Saturday's casualty list.

THE MAKER OF CHAMPIONS.

FRANK SHAUGHNESSY,

Whose 207th Ottawa team triumphed over the Hamilton Tigers Battalion team on Saturday by a score of 32-3.

LT. M. R. McCRACKEN WINS MILITARY MEDAL

Undergraduate in Science Was With the Second Divisional Signal Company.

An official announcement from the War Office states that the Military Medal for gallant conduct on the Canadian front has been awarded to Sergt. (now Lieut.) Merrick Rennie McCracken, Sci. '17, serving with the Canadian Engineers. Lieut. McCracken enlisted during his second year in the Faculty of Applied Science in the 2nd Divisional Signal Company then being formed at Ottawa. He was then a member of the McGill Contingent, C. O.T.C. Enlisting as a sapper, Lieut. McCracken won promotion rapidly, and before he received his commission was a sergeant. Other McGill men who enlisted in this unit have also won their commissions. Lieut. McCracken is 26 years of age, and his home is in Danville, Que.

R. V. C. NOTES.

There will be a class meeting of R. V. C. '17 to-day at 1 p.m., in the Common Room.

The girls on duty to-day in the Tea Room are as follows: I. Hurd, F. Grindley, E. Monk, W. MacLaren, L. Giles, E. Henry, E. Hill, I. Imrie, E. Jackson, D. Lewis, H. Scovil, E. Forde, M. Fritz, B. Horang, M. Lindsay, G. Livingstone, G. Moody, B. Greenwood, F. Walker, G. Gardner, C. Hay, L. Fowler committee member in charge.

R. V. C. Tennis.

It is requested that matches be played as soon as possible. All individual tournaments must be played off by Monday night, and the Interyear Tournaments by Tuesday night, at the latest.

H. C. HORATIO'S FUNERAL.

The funeral of H. C. Horatio, Med. '20, took place on Saturday afternoon from Wray's undertaking parlors. Interment was made in Mount Royal Cemetery, a number of fellow-students of the deceased being in attendance.

FIRST MONTHLY CHURCH SERVICE WELL ATTENDED

Dr. Griffith-Jones Speaks at Emmanuel Church.

MANY STUDENTS PRESENT.

A War Sermon Well Worth Hearing Was Given in Fine Style.

The Rev. Dr. Griffith-Jones, Principal of Bradford Theological College, England, preached last evening in the Emmanuel Congregational Church before a large congregation of students. The subject of his address was "What is the Character of God in the Searchlight of the World War." In a very eloquent manner, and with a purity of diction which characterizes the eminent speakers of the Old Country, he handled his subject in a manner which must have delighted even the most critical of his audience.

Dr. Griffith-Jones began his address by saying: "Great events are great searchlights, they probe our hearts; they put our beliefs to the test; they try us to find out what manner of men we are. This war is preeminently a testing time for all of us; we cannot escape its scrutiny. It is finding out our weak places, tells us if we are loyal subjects or whether we prefer others to do our fighting for us while we go in for its profits. It unfolds the hidden heroism and manners of us all, and perhaps when the final word is told it will be found that nothing will be more thoroughly tested by this war than the quality of our religion, the vitality of our faith. Against the hard background of the suffering, the cruelty, the horrors of this tragedy every great doctrine is being measured, every belief concerned for man and the world is being weighed, and only those which stand the tension are likely to mirror into the new time.

"I like to make clear," Dr. Griffith-Jones said, "that I do not stand here for any hard and fast dogmatic position, nor am I here to denounce those whose faith is breaking down under the strain of the war, as blameworthy. No one who has had to fight as I have had to fight for every inch of foothold in the Christian faith can take anything but a sympathetic attitude to those still painfully climbing out of the slough of doubt and despond.

"My object is not to denounce, but to help; not to paeon anathemas, but to open the doors of invitation and hope. The question of to-night is 'What is the Character of God in the Searchlight of the World War.' This question in earlier times, when great calamities broke out over the earth, and mankind was met by famine, pestilence and war, would be asked in a different manner. Men questioned themselves and each other then, and said, 'what sin have we committed that God should bring these evils upon us?' but now-a-days the culprit and judge have changed places; God is at the bar and man on the judgment seat; and we cry out in injured innocence and perplexity, 'Why dost thou deal so with us?' Perhaps, the speaker said, we shall find that in the end it forces us to ask ourselves the other question as well.

In commenting directly on the subject, Dr. Griffith-Jones said: "War is no new phenomenon in the experience of men. When the historic curtain rises we find that men and nations are accustomed to fight each other. Even from pre-historic relics and weapons we come to realize that war is a very old fact. There is nothing more apparent than man's inhumanity to man. It is therefore neither the fact nor the character of the war, but rather its colossal scale and murderous losses; its vastness and intensity, and more than these, the fact that it seems to register so terribly backward a step in the evolution of humanity and progress of civilization, which makes us ask the question, 'Does God not care for the world?' or is He helpless to stop this terrible downfall. It was Carlyle, I think, who, scandalized at the many evils of society and impatient at the silence of God, cried out one day, 'Why does He not do something?'" the speaker continued. "This question raises the whole problem of the relation of God to the evil which is in the world. There are

GRANDESCUNT AUCTA LABORE.

To those who have kept in close touch with the University during the past two years, the extent to which McGill has participated in the present conflict is well known. Practically speaking, every issue of the Daily for the present session has contained the name of at least one McGill man on the casualty list, while the weekly average has been in the neighborhood of ten.

When the war broke out men from McGill were among the first to offer their services, and a steady stream of recruits from the University has been flowing to the various recruiting depots. The Universities Companies claimed many of these, but other Battalions have also had their share. The men who have gone overseas are upholding the name of Alma Mater, their worth being ably spoken of by the many decorations and honours which have been conferred upon them. Going a step farther, McGill men desired to offer a distinctive combatant body, which would be a purely McGill unit. It was this thought that resulted in the raising, equipping and training of the No. 6 (McGill) Battery, Siege Artillery, which, according to the last advices received here, is still in training in England, but which expects to depart at any time for service at the front. The Battery, as it is familiarly known here, while training at Halifax before crossing to the other side, was the recipient of the highest possible compliments upon both the conduct of the men composing it as well as the creditable showing made by it as a whole.

The No. 3 General Hospital, offered by the University, for the use of the Empire, was equipped and chose its staff from the Faculty of Medicine. The work done by this unit is well known here in Canada, but more particularly in France, the scene of its activities. It has been said by those who know what they are talking about that the No. 3 General is, if not the best, then one of the very best Hospitals doing service at the front. It has caught up to, and in many cases passed the marks set by other hospital units which were established quite a while before the McGill contribution reached France. The remarkable progress and the enviable record made by the hospital is due to the management and direction of Colonel H. S. Birkett, who has been indefatigable in his efforts to do all in his power, and in the power of those under him to alleviate the sufferings of those who are brought into the wards for treatment. A great number of men from the Medical Faculty who will graduate this year have declared their intentions of going overseas to help along this work of mercy.

The possibility that another Battery of Siege Artillery may be authorized in the near future has been favourably commented upon by the student body. The arrangements, as outlined, would allow men who are at present drilling under the present University regulations to transfer to the Battery provided that they would sign up for service overseas afterwards, and in this way they would be working towards a definite objective, and at the same time receive the same training along purely educational lines as they are getting at present. The student will take a more active interest in his work if he knows just where he is going to be at the end of the scholastic year, and in a particular manner the man of the Science Faculty would be only too glad to have an opportunity of putting into active practice the principles which he has been studying during the past years of his course.

The khaki columns that come and go across the Campus, which formerly knew only the spiked boots of the football players; the military commands that ring sharp and clear, where signals for some rugby formation were heard before; the crowds that line the sides of the one-time gridiron, stand in mute admiration of the defenders of the Empire in contrast to the time they frantically howled and cheered their favourites on to victory,—all these express the military spirit that pervades the University and betoken the determination of every one at McGill to help in every possible way to attain the victory which we know will come.

EDITORIAL NOTE.

The announcement of the Literary and Debating Society executive that the first general meeting of the year will be held this week is gratifying news to those of us who feared that the Society would not be reorganized. The "Lit." is a necessity to our college life, and one of the few societies able to confer an educational as well as a social benefit upon its members. The value of organizations of this kind has been commented upon more than once this year in these columns, and while the executive are to a certain extent responsible for the year's arrangements, yet the success of the meetings will depend upon the individual members. The attendance at next Wednesday's meeting will serve as a straw to show which way the wind of student activity is blowing, and let us see if a somewhat general lethargy amongst the students has extended to the members of the Literary and Debating Society.

MEETING OF "LIT."

A general meeting of the Literary and Debating Society, with which is affiliated the Canadian Club, will be held on Wednesday afternoon at 5 o'clock, in Strathcona Hall. The success of the Club for the coming season depends largely on the attendance at this meeting. All those who are interested in debating are especially requested to attend.

GETS NEW APPOINTMENT.

Lieut. Herbert Stuart Everett, Arts '16, who was wounded while at the front with the 6th C.M.R., has been appointed Assistant Adjutant of the New Brunswick Kilties, now being organized at Fredericton.

GEOLOGISTS IN EMBRYO LEARN OF FORMATIONS

Fourth Excursion of the Year's Series Held Saturday.

DR. ADAMS GIVES LECTURE.

Party Examines Rock Formation Of Mount Royal at Various Points.

The fourth of this year's series of geological excursions taken annually by the students of third year Geology under the direction of Dr. Bancroft, was made on Saturday. Some forty students of Arts and Science proceeded from the steps of the Museum at nine o'clock, armed with hideous weapons, and evidently bent upon tearing up and pulverizing the natural resources of the vicinity. The previous excursions had been in charge of Dr. Bancroft, who has an unlimited knowledge of the subject which one is inclined to envy. The excursion of Saturday was under the management of Dr. Adams, who was accompanied by Dr. Bancroft.

Before starting on the trip, a lecture was given from the steps of the Museum, in which Dr. Adams outlined the reasons for the existence of Mt. Royal and the geological periods concerned in its formation. There were three such geological periods. The first was the period of the first transgression of the sea, the second was a period of igneous activity, when Mt. Royal was a volcano. The third was the period of the second transgression of the sea.

Upon leaving the steps of the Museum, the party proceeded up McTavish St., and were halted facing the reservoir. Here, the evidence of the two periods of submergence was pointed out, and could be seen clearly from the distinct formation of the different layers of limestone. The road on Pine Ave. is laid over the area of the first submergence, and the lower layer of limestone on the north side of the reservoir is that of the later period of submergence. The limestone descends to the depth of between five and six hundred feet.

The party then moved on to the head of Peel St., and there had an opportunity to examine again the layers of limestone. Each of these layers were at one time covered by the sea, and hence it is impossible to determine definitely the period it took for their formation. They have all a slight depression toward the sea, which depression could easily be seen if a horizontal plane were to be taken through any one of them. They descend and can be seen again on St. Helen's Island, showing that the slope of Mt. Royal is made up of a series of well defined beaches which mark the different stages of the retreat of the sea at the end of the Glacial Period. The city of Montreal is built on three of these beaches. A dyke of the second period of igneous activity was pointed out. This dyke consisted of orthoclase feldspar, and penetrated the then existing dykes. The rock of this dyke had a disagreeable odor, and hence has come to be known as 'stink stone." The second dyke within the first proves that there was a second eruption after the first had occurred.

The next move was to inspect the rock at the foot of the cliff near the head of Peel St. This is known as the "Table rock." A different character of rock was met with here. The formation was what is known as "Utica shale," which brought the party up to the geology of Mt. Royal itself. Mt. Royal consists of a body of intrusive plutonic rock penetrating the nearly horizontal limestone of the Trenton formation. There were two main intrusions, comprised of essexite and of nepheline syenite respectively. These intrusions were followed by a swarm of dykes, some of them ranging from a mere film of six feet in width, and sheets of similar rock which came through the limestone in all directions. In some places the intrusion tilts up the limestone, while in others the limestone assumes a horizontal attitude. This intrusion represents the basis of the volcano, the crater of which cannot be definitely located because it was probably a few hundred feet above the present altitude of the top of the mountain. Other local mountains whose formation was due to igneous activity are Beloil, Rougemont, Shefford, Brome and Johnson.

The essexite exposed at the Lookout represents the main intrusion of Mt. Royal. The grain of the essexite varies from place to place. It is composed primarily of pyroxene and hornblende, with plagioclase and a little nepheline. Proceeding across the mountain and through the cemetery, the character of the essexite changes, and assumes idiomorphic development, the specimens consisting of well-defined crystals.

On the Outremont side of the mountain, limestone is found again. The limestone here has been metamorphized into marble owing to its inability here to be decomposed into carbonic acid and lime. The organic limestone has been turned into crystalline limestone. The other side of Mt. Royal is said to be the best place in the world to observe the effects of metamorphism.

The C. N. R. is built through limestone from the terminal to the Lookout, and from there to within a short distance of the Outremont shaft through essexite, and from thence to the west portal through limestone again. This brought the party to the end of their trip. They found a great deal of value in the geological line. A few were exposed to bodily danger on some parts of the trip, and considered it a little safer to stand aside when the ladies of the R. V. C. made vigorous attempts at getting some inside information from a large boulder of essexite. The excursionists were weary and tired when they arrived at Bellingham and St. Catherine Roads, and had boarded the tram.

The interest of the excursionists in the work is shown by the fact that the entire class have shown up punctually for the start, and they are pleased that they still have some more to look forward to before the snow flies.

Clearing Sale of FALL OVERCOATS

Regular $15, $18 and $20 Values

Reduced to

$13.00

Our entire stock of FALL OVERCOATS, consisting of Cheviots, Serges, Scotch Tweeds and Fancy Mixtures, in a big range of Young Men's Models—including the "Pinch Back Coat"—also Conservative Styles in all sizes. $13.00

ORCHESTRA PRACTICE.

Practice will be held on Tuesday night this week instead of Wednesday. This change is necessary on account of the annual "Conversat." being held in Strathcona Hall Wednesday night of this week.

It is particularly important that every member be present, as permanent officers and leader for the year will be elected at this meeting.

There are still some vacant places left for any who have not as yet turned out for the practices. Practice begins at 7.30 sharp, in Strathcona Hall.

THEOLOGS. AT PLAY.

The Presbyterian Association Football team played and defeated the Wesleyan team Saturday on Fletcher's Field by the score of 3 to 1. The Presbyterian team were at no time hard pressed, and had it on the Wesleyanites in all departments of the game. There was more or less rough play on both sides, no less than three men being laid out at one time or another during the game. There were about 150 spectators. The game was featured by mediocre playing on either side.

The Royal Military College of Canada.

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government Institution, designed primarily for the purpose of giving instructions in all branches of military science to Cadets and Officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and in addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

The length of the course is three years in three terms of 9½ months each.

The total cost of the course, including board, uniform, instructional material, and all extras is about $800.

The annual competitive examination for admission to the college, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the secretary of the Militia Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

Many graduates owe a large measure of success to our glasses, which made their vision clear and their studies a pleasure.

TEN McGILL MEN AMONG THE CASUALTIES; GOOD WORK IS REWARDED BY DECORATIONS

Lieut. H. H. Scott, Law '14, Killed as He Led Men Towards German Position—Capt. Murray, Rhodes Scholar, is Wounded for the Second Time—Lieut. Dougall Cushing Turns up, a Prisoner of War in Germany — Notes of Other Graduates and Past Students—Major Phillip Burnett, Medical Graduate, Gets the Distinguished Service Order.

CASUALTIES OF THE WEEK.

Killed in Action.

Scott, Lieut. H. H., Law '14, 87th Battalion, C.E.F.

Wounded.

O'Halloran, Lieut. M., Arts '15, Canadian Artillery.

Mustard, Capt. H. R., Med. '14, C. A.M.C.

Bickerdike, Capt. R., Jr., Sci. '91, 87th Battalion, C.E.F.

Haultain, Lieut. A. G., Sci. '10, Canadian Engineers.

Murray, Capt. W. E. G., Arts '12, Royal Flying Corps.

Grant, Lieut. W. J., Med. '14, Royal Army Medical Corps.

Bignell, 2nd Lieut. H. V., Sci. '15, Royal Engineers.

Macafee, Lieut. R. E., Sci. '10, Canadian Engineers.

Prisoner of War.

Cushing, Lieut. Dougall, Arts '07, Law '10, Royal Flying Corps (previously reported missing.)

Decorations.

Burnett, Major Phillip, Med. '03, No. 6 Field Ambulance, D.S.O.

Morris, Lieut, W. H., Sci. '16, P. P.C.L.I., Military Cross.

Howell, Lieut. J. G., past student, Royal Flying Corps, Military Cross.

McCracken, 1 Sergt. (now Lieut.), M.R., Sci. '17, Divisional Signal Co., Military Medal.

Lieut. H. H. Scott.

According to official advices, Lieut. Henry Hutton Scott, Law '14, has been killed in action. The first intimation of Lieut. Scott's death came in the official Eye Witness story from Canadian Headquarters in France, which stated that he had lost his life while at the head of his men, and at a time when they were engaged upon a German position. The Eye Witness account reads as follows:

"Lieut. Scott, son of Canon Scott, of Quebec, was advancing at the head of his men and was directing their progress in accordance with the artillery barrage. As the men threw themselves down to await the momentary lift of the guns, Lieut. Scott was shot and instantly killed. His death was not at first remarked, and his men still waited for the signal to advance. Not until the barrage had passed beyond the German trench did the men realize the situation.

"Then, with a fierce impetuous rush which nothing could arrest, they dashed for the German trench eager to avenge the death of their gallant young officer. In the meantime, however, the enemy had opened a rapid fire at this point. We therefore, suffered some casualties, but the result was the same. Our men went in with the bayonet, and there was short shrift for the Germans."

Lieut. Scott was 32 years of age, and a native of Quebec. He attended Bishop's College, Lennoxville, before he came to McGill, and entered upon his studies at the Faculty of Law. Upon graduation he was connected with the firm of Meredith, Holden and Co., Merchants' Bank Building, and left this office to take out a commission in the 87th Grenadier Guards.

Lieut. M. O'Halloran.

Lieut. Melbourne O'Halloran is among the wounded of the artillery. Lieut. O'Halloran is a graduate of McGill in Arts of the class of '15, and went overseas a year ago with a draft from the 33rd Battery from Kingston, Ont. He is the son of G. F. O'Halloran, Arts '83, Law '15, Deputy Minister of Agriculture at Ottawa, and a grandson of Sir Melbourne Tait, Law '62. "Tim" O'Halloran was well known about the University during his course in Arts. Prominent both in academic work and in University student activities, he was connected in an official capacity with the Economics Club, the Literary and Debating Society, and McGill Daily, as well as being a member of his class football and hockey clubs. He served three years on McGill Daily, being sporting editor in the last two years of his course. Lieut. O'Halloran came to McGill from Ashbury College, Ottawa, and intended to enter the Faculty of Law after completing his course in Arts.

Lieut. A. G. Haultain.

Relatives in Montreal have received a cable from England announcing that Lieut. Alexander G. Haultain, Sci. '10, of the 11th Field Company, Canadian Engineers, First Canadian Division, is in hospital at Brighton, England, suffering from nervous debility. Lieut. Haultain trained at Ottawa before he went overseas with a draft of the Canadian Engineers. After further training in England he was drafted to the First Canadian Division.

Capt. Hugh R. Mustard.

A recent casualty list announces that Captain Hugh Roy Mustard, Med. '14, wtih next of kin at Victoria, B.C., has been wounded. Captain Mustard went overseas with a field ambulance from Victoria, some time ago. He was born in 1887 at Stony Mountain, Man., and is the son of John Mustard.

Lieut. W. J. Grant.

Cable advices from England state that Lieut. William J. Grant, Med. '14, serving with the Royal Army Medical Corps, has been wounded. No further particulars are available. Lieut. Grant, who is a native of Georgetown, P.E.I., and a graduate in Arts of St. Dunstan's College, Charlottetown, enlisted originally with the Canadian Army Medical Corps, and in July, 1915, was transferred to the Royal Army Medical Corps, with which he has since been serving. Lieut. Grant was, during his college career, actively associated wtih the Columbian Club, and was chairman of the Medical Dinner Committee of 1914.

THE WEEK IN REVIEW

The first definite action with regard to the formation of a second McGill battery of siege artillery for service overseas was taken at last night's meeting of the Students' Council at the Union, when Capt. Sir Stopford Brunton, at present instructor in trench warfare for this military division, was present, and laid his proposition before the meeting.

The ten room which students of the R. V. C. are operating in Strathcona Hall to benefit the Red Cross, has been well patronized, and sixty dollars made during the week.

Inter-faculty football commenced with a game between Arts and Medicine, in which Medicine triumphed by a score of 53-7. Arts presented a weak line-up through the enlistment of so many of its players of previous years.

Lieut. "Bill" Morris, a student of Science '16, serving wtih the P.P.C.L.I., has been awarded the Military Cross.

The City League, in which McGill enters a team, will again be in operation this winter with the possible inclusion of two military teams to fill the vacancies caused by the withdrawal of M.A.A.A. and Victorias.

The Theological Undergraduate Society is the title of a new organization formed to embrace in its membership all the students of the Affiliated Theological Colleges. A. N. Withey, M.A., Arts '15, is the first president of the Society. The medical students of No. 3 Canadian General Hospital (McGill) have organized a Society to carry on the work fostered by the parent Medical Society of the University, and also to attend lectures and clinics under the direction of the officers of the Unit. F. G. Miller, '17, is president.

The Second Year students are to be fined by the Committee on Morals and Discipline for an organized withdrawal from lectures on the day previous to the Sports, and also for the occupation of University property contrary to the warning issued at the time of a similar occurrence last year.

Capt. R. Bickerdike.

Official notification from the Records' Office at Ottawa brought word to Robert Bickerdike, M.P., Montreal manager of the Western Assurance Company, that his son, Capt. Robert Bickerdike, Jr., Ma.E., Sci. '91, serving with the 87th Grenadier Guards at the front, had been wounded. No particulars with regard to the location of Lieut. Bickerdike was given, nor was any information afforded as to the nature or extent of his wounds, Mr. Bickerdike has cabled to England for further particulars.

2nd Lieut. H. V. Bignell.

Cable advices from England state that Second Lieut. Hilary V. Bignell, Sci. '15, who was middle wing in the championship McGill senior football team of 1913, has been wounded. Second Lieut. Bignell has been serving with the Royal Engineers since he was transferred about a year ago from the Princess Patricia's Canadian Light Infantry. Second Lieut. Bignell enlisted in the spring of 1915 with the First Universities Company to reinforce the Princess Patricia's Canadian Light Infantry. He went overseas with the Universities Company as a private, and when he reached England was promoted to a lieutenancy in the Royal Engineers. His home is in Montreal, and he was well known as an athlete at the Montreal High School.

Capt. W. E. G. Murray.

Word has reached the University that Captain W. E. G. Murray, Arts '12, Rhodes Scholar from McGill in 1913, and founder of McGill Daily, is in hospital in France suffering from injuries received in action in the Royal Flying Corps in France. The details of the injury to Captain Murray are meagre. Such informatian as is available is contained in a letter from the young aviator himself, written ten days ago. He simply states he has been in a "bad crash," and that his back is injured.

Captain "Bill" Murray was in England attending to his studies at Oxford when the war was declared. He immediately enlisted in King Edward's Horse, but after a short period of service with this unit was transferred to the Royal Flying Corps as a second lieutenant. He has since been connected with the Royal Flying Corps, and is now recognized as one of the most efficient flyers in that branch of the service.

For a year he has held the rank of captain, being a flight commander and being employed on special detail in intelligence work. Last year he was brought down in a fight with a German plane, and had both shoulders broken, and his collar bone fractured as well. He was struck in mid-air on this occasion, but by dint of skilful manipulation of his machine managed to land behind the British lines.

Lieut. R. E. Macafee.

Lieut. Ralph Evans Macafee, Sci. '10, serving with the Canadian Engineers, is reported wounded. Lieut. Macafee enlisted about a year ago with the Engineers at their training depot at Ottawa. His home is in Hamilton, Ont., where he was employed by the Canadian Westinghouse Company.

Lieut. Dougall Cushing.

Eric A. Cushing, Sci. '17, has received word from England that his brother, Lieut. Dougall Cushing, Arts '07, Law '10, who was reported missing on September 16, has communicated with friends in that country that he is a prisoner in German hands. Lieut. Cushing was a member of the firm of Barron and Cushing, advocates in this city, when he entered upon a course of training preparatory to joining the Royal Flying Corps overseas. He was previously a captain in the cavalry of the Canadian militia, but had no difficulty in qualifying as an aviator. After a period of training in England, Lieut. Cushing crossed to France, and was constantly in action until the date upon which he was reported missing. He has four brothers in khaki.

Major Burnett, D.S.O.

Friends in this city have received word from Major Phillip Burnett, Med. '00, with No. 6 Field Ambulance at the front, that he has received the Distinguished Service Order for good work at the front. The letter from Major Burnett simply stated that he had received a despatch reading: 'Congratulations. Awarded D. S. O. Official." Major Burnett was lecturer in dermatology in the Faculty of Medicine and Dermatologist at the Royal Victoria Hospital when he set about the organization of No. 6 Field Ambulance here in the spring of 1915. There are a number of other McGill men in this unit which has seen some hard fighting recently, its commanding officer, Lt.-Col. R. P. Campbell, Arts '97, Med. '01, being killed in action. Major Burnett is a graduate in Arts of the University of Toronto, and did post graduate work in London after leaving McGill.

Lieut. Morris, M.C.

According to information which has been received at the University, the Military Cross has been awarded to Lieut. William H. Morris, Sci. '16, of the Princess Patricia's Canadian Light Infantry, for gallant conduct during the big action on the Somme on September 15 last, when the "Pats" added to their already illustrious name by making one of the finest charges in the history of the Canadian Expeditionary Force. No information is given with regard to the particular exploit, which gained for Lieut. Morris, who is particularly well known at McGill because of his record in athletics, the coveted blue and white ribbon. The letter which conveys the information simply states that the decoration has been awarded to him, and adds that 'Hugo ought to have gotten the Victoria Cross."

E. P. Mathewson, Sci. '85, has resigned as manager of the reduction works of the Anaconda Copper Company at Anaconda, to accept the position of General Manager for the British America Nickel Corporation of Sudbury, with headquarters at Toronto.

Alvah Ernest Foreman, Sci. '03, assistant city engineer of Victoria since 1912, is resigning at the end of this month. He will stay in Victoria until the end of the year, at least, and possibly locate there permanently. He is considering offers from several engineering corporations.

Mr. and Mrs. A. D. McGillis, Montreal, announce the engagement of their daughter, Hilda, to Lieut. Michael P. Burke, Law '12, son of Mrs. G. E. Hall, Montreal, the marriage to take place in November. Lieut. Burke is a former member of the Students' Council, and has recently been placed in command of a draft to proceed overseas from the Montreal Heavy Brigade.

Capt. "Sinc." McEvenue, Sci. '14, the former star McGill quarter-back, and captain of the championship team of 1913, which under Frank Shaughnessy, won the Intercollegiate title, has left for Bramshott, England, where he will become an aide-de-camp on the staff of Brigadier-General Meighen, Arts '89.

With the re-organization of the Canadian Army Medical Corps overseas, consequent upon reports which have been made to the Militia authorities at Ottawa, has come the appointment of Dr. George E. Armstrong, Med. '77, Professor of Surgery and of Clinical Surgery in the Faculty of Medicine, and one of the most eminent of Canadian surgeons, as surgeon-in-chief of the Canadian medical services with headquarters at London.

Lt.-Col. C. A. Peters, Med. '98, has been appointed assistant director of Canadian medical services in England, according to advices from England. Lt.-Col. Peters went overseas last spring in command of No. 9 Field Ambulance.

For the second time since he volunteered for active service at the time the First Canadian Division was organized, Capt. J. F. E. Gendron, Sci. '15, now of the 2nd Canadian Pioneers Battalion, is back in Canada. Capt. Gendron landed in Halifax on Wednesday, and is now en route to his home in Hull, Que.

A London despatch says that Capt. E. Stuart McDougall, Arts '07, Law '13, of the Princess Patricia's Canadian Light Infantry, who was wounded in the fighting of June last, and has since been in hospital in England, has returned to France to rejoin his unit. Capt. McDougall went overseas as second in command of the First Universities Company.

Dr. G. A. B. Addy, Med. '90, has been attending the American Medical Congress at Baltimore,

QUALITY MAINTAINED FOR OVER 30 YEARS

TIGERS BEATEN BE SHAG'S TEAM BY BIG SCORE

205th Tigers Go Down to Defeat Before Ottawa.

OTTAWA, 32; TIGERS, 3.

Harvard Gains a Decisive Victory Over Cornell With Little Effort.

HAMILTON, Oct. 28. — What will probably be the last senior Rugby fixture at the H. A. A. A. grounds this year took place here this afternoon, when the 205th Tiger team clashed with Frank Shaughnessy's aggregation, the 207th team of Ottawa. Both teams were in the pink of condition, though Shag's team was minus Major Sammy Manson and Ernest Paisley. The game, which resulted in a victory for Ottawa to the tune of 32-3, was full of ginger and sparkling plays. From the first Ottawa appeared to have no trouble in getting through the Tigers' line. A series of end runs proved successful for Ottawa, and the first quarter ended with the score Ottawa, 10; Tigers 1. Shag's backs were catching better, and their mass plays appeared to bewilder the Tigers. Time after time they plunged through the Tiger line.

In the second quarter, however, the Tigers rallied, and a massed play resulted in the ball being rushed over for a try, which was converted. But this rally was of short duration, and again the Tigers began to slow up, while Ottawa tore through their line almost at will, and in spite of Erskine's good kicking, half-time found the score Ottawa, 16; Tigers, 1.

The third quarter opened with a series of kicks, which finally resulted in a rouge for the Tigers. Score, Ottawa, 16; Tigers, 2. At this period the Tigers came back and were playing Ottawa off their feet, and Tigers kicked for another rouge. But again their line fell to pieces, and Ottawa broke through on each down. This break in the Tigers' play resulted in two successive trys for Ottawa, one of which was converted. Score, Ottawa, 27; Tigers, 3. Then followed an interchange of booting, after which Ottawa again went through for another try, which, however, they failed to convert. After this neither team succeeded in scoring, and full time found the score, Ottawa, 32; Tigers, 3.

The line-up:—

Ottawa.		Tigers.
Smith	Halves	Evans
Breen		Erskine
Boucher		Smith
Davies	Flying wing	Awrey
Wiser	Quarter	Chagnon
Stalker	Outsides	Woolman
Carling		Jeffries
Pritchard	Middles	House
Hartley		Potticary
McElliott	Insides	Jewel
McCaffery		Lang
Adams	Scrimmage	Myers
Westman		Ireland
Seaton		Mitchell

Officials—Capt. Jack Lewis and Lieut. Eddie Gerard.

Cornell Was Easy.

Harvard Stadium, Cambridge, Mass, Oct. 28.—Before 10,000 spectators, Cornell and Harvard lined up for their annual gridiron battle this afternoon. A light west wind with plenty of sky made conditions ideal.

First Quarter.—Harvard won the toss and Miller kicked off to Thatcher. After an unsuccessful attempt to rush the ball, Horween kicked over the Ithacans' goal line for a touch back.

After Benedict punted for Cornell, Casey started tearing up the line with gains averaging about eight yards. Horween again kicked across the Cornell line and after a brilliant dash by Billy Robinson, who received Cornell's return kick, the Harvard quarter-back kicked a field goal from the 24-yard line. After an exchange of punts the period ended with the ball in Harvard's possession on Cornell's 26-yard line. Score: Harvard, 3; Cornell, 0.

Second Quarter.—As soon as the second quarter opened Casey tore through the entire Cornell team for a touchdown, fighting his way across the line with six men clinging to him. Robinson missed the goal. Cornell took a brace and rushed the ball to the shadow of Harvard's goal, where Shiverick missed a drop kick. Harvard punted and Wheeler recovered a fumble. After an exchange of punts the Ithican backs' fumble lost them the ball, and Eddie Casey skirted the end for 20 yards as the half ended.

Third Quarter.—Horween added another touchdown and goal to the Harvard total in the third quarter. Score, Harvard, 16; Cornell, 0.

Billy Murray, who was now driving the Crimson eleven, kept the Crimson team going steadily toward the Cornell goal. Harvard was outplaying the Ithicans and at the close of the third quarter Horween intercepted a pass by Shiverick, which gave Harvard the ball well in Cornell territory.

Cornell never had a chance in the last period, while Harvard came through with seven more points. The final score: Harvard, 23; Cornell, 0.

Dartmouth Victorious.

Princeton, N.J., Oct. 28.— Twelve thousand persons were scattered about Palmer Stadium this afternoon when Dartmouth clashed with Princeton in the Tigers' first really big home game of the season.

Tibbott failed at his first try for a field goal, kicking from the 48-yard line in the first period. Princeton several times had the ball in the shadow of the Dartmouth goal, once at the 4-yard line, but the visitors held. Successful open play by Dartmouth, including one thirty and one ten-yard forward pass, featured the close of the quarter.

Opening up smashes through tackle and on long end plays, Dartmouth kept the ball in Tiger territory much of the second period. Shortly before the period ended Garrish kicked a placement goal, the first against the Princeton team this year.

A spectacular 55-yard run by Driggs for Princeton after he had intercepted a forward pass thrown by Cannell gave a Princeton touch-down in the third period. There was no further scoring in the game.

(Continued from Page 1.)

three possibilities: First, God is helpless in the face of evil. In this case God is not omnipotent, and if God is not omnipotent He is no God at all. We must therefore, as believers in God, put this hypothesis aside. Secondly: God permits evil to exist, though He could smite it into nonentity at any moment. If so, then He is the participant in the evil which he permits to exist, but if there is any truth at all in the Bible revelation this hypothesis implicates either too much or too little of God. Too much if we mean that evil is here with His consent; too little if we mean that evil is here in spite of all He would do to prevent it. Thirdly: Evil is in the world as only the necessary condition for the development of goodness. In other words it is one of the contingent possibilities which follow on the bestowal of moral freedom on man.

The speaker then said that if there were no moral alternatives men could not be considered as free, but now with this strange but wonderful endowment and ability man can choose freely and is a creature who can say no to his Creator. Because you and I are free we can do evil and we can do good; we can be vicious and we can be virtuous. The possibility of good can only exist with the possibility of evil, and God, having created a free being, would not be self-consistent if he would withdraw the gift of free choice. As a father, God, through the Bible, has set about winning the world back to Himself, but compulsion will never be brought to bear on man or nations. The great underlying facts and tendencies which have made this world conflagration possible, are to be found in the state of the world itself and in human nature. This present age has been characterized by the extraordinary and ever increasing control of men over the forces of nature. Time and space are under man's command. Man has suddenly come into a vast heritage of power and opportunity by utilizing the forces of nature. The great industrial revolution has increased the wealth of the world. In the meantime religion has been steadily losing its hold on the civilized world. The great spiritual world was being forgotten in the absorbing interest of the secular, and faith was lost in the intoxicating sense of power over the universe. These influences have helped to secularize the human soul and to make it imagine itself independent of divine authority and control. "The world was the kingdom of man." In this new atmosphere military power began to awaken, and to spread like an epidemic throughout the world. Armaments began to grow and spread and become more and more formidable, costly and destructable.

The speaker then spoke of Germany, her former advance in spiritual realities and science, and then her conversion to a world physical conquest. When the spark came the war broke out upon such a world as the lecturer had pictures. Now suppose God would interfere by putting an end to this frightful tragedy, as many of us would wish, would this action improve the situation, would it cure the evil in the world, would it put an end to man's lust for power, would the nations care to trust Germany and each other for the future? We know well that a compromise has never been successful, and if this war were just now stopped by force, even though it be the unmistakable omnipotence of God, it would not for a moment guarantee a new mind in Europe, and this evil scourge is working out its own remedy. The world is being led back to purity, to life, to God.

Already we have proof that the lesson is being driven into the world's very soul through the tragedy of the war. The awakening, even of Germany, has begun. The speaker then referred to the seriousness which characterizes both the British and French peoples, and the influence over the rest of the warring peoples. The evolution of the future is towards the spiritual, not the material.

In closing the speaker appealed to the young men of the Empire, and especially of Canada, that they should in the days to come put the spiritual above the material, and purify both civic and political life of the Dominion, thus making the future of the race secure in the evolution of the world.

PARTICULARS OF DEATH OF DR. CAMPBELL

Fell While Picking Up Wounded Soldiers.

DIED SOON AFTER HIT.

Suffered Compound Fracture of Right Arm and Wound in Right Thorax.

A copy of a letter from Capt. W. M. Carr, of the 18th Infantry Battalion, to Major T. J. Murphy, bearing the details of the death of Lieut.-Colonel R. P. Campbell, Med. '00, whose death in action was previously reported in the columns of the Daily, has been received by Dr. F. J. Shepherd, from Col. H. S. Birkett. Lt.-Col. R. P. Campbell went over with No. 6 Canadian Field Ambulance early in the spring of 1915, and rendered valuable service in this capacity. The Colonel was woudned in the right arm, and by a penetrating wound of the upper right thorax. He fell on the edge of a shell hole, but he was carried to the dug-out of Capt. Argue, where he died about half an hour after he was hit.

The following is the letter referred to:—

Sept. 17th, 1916.

Headquarters,
18th Canadian Infantry Battalion.

Dear Major Murphy,—

It is my sad duty to inform you of the death of Lt.-Colonel R. P. Campbell, and knowing that you will wish for the details. I wil give them.

About 6 a.m. yesterday morning, I set out for the Sugar Refinery with a party of stretcher bearers. Almost at once I encountered Colonel Campbell, and he asked where I was bound for. I told him, and he said that was his destination also, so we travelled together. The party arrived in good order, but reduced to six in size, as we sent the other bearers back with wounded men. The Huns must have seen us, for shelling commenced almost at once, and we had rather a hot time before Capt. Argues' dug-out was located. We spent about 20 minutes there making plans for the removal of the wounded, and then your Colonel said he must return, or they would think him lost. We travelled together for a short distance, and then separated, each taking two stretcher bearers. I had not gone 1? yards along my trench when one of the stretcher bearers rushed back, saying that the Colonel was hit. I doubled back to where he was, and found him lying on the edge of a shell hole. He called me by name, and told me that he was hard hit, and told me to look after the others, who were not so badly off.

On examination he was found to be suffering from a compound fracture of the right arm, and a penetrating wound of the upper right thorax, with a very weak pulse, and considerable shock. The two bearers carried him to the Aid Post, under such conditions that I am recommending them. The Colonel was taken into this dug-out and attended to by Capt. Argue and myself, but his condition was hopeless. He died one-half hour after being hit, quietly and peacefully.

The horrors of this war are emphasized when a gentleman of such ability and possessing such a fine disposition is lost. His personal effects were turned over to Capt. Kennedy.

Your sincerely,
(Signed), W. M. CARR,
Medical Officer, 18th Canadian Infantry Battalion.

SCIENCE PRACTICE TO-DAY.

There will be a practice of the Science football team this afternoon at 4.30, on the Stadium. This will be the last heavy practice before the game with Medicine on Wednesday, and hence it will be essential that all the men turn out, and put on the finishing touches. It is particularly desired that men who have not contemplated playing, but are able to play at all, turn out, and give the team a scrimmage. The team has had very little opportunity to have scrimmages so far, and are greatly in need of it. It is expected that a short signal practice will be held to-morrow on the Stadium.

PROVINCE OF QUEBEC

DEPARTMENT OF COLONIZATION, MINES AND FISHERIES.

The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.

The Mining Law gives absolute security of Title and is very favourable to the Prospector.

MINERS' CERTIFICATES.

First of all, obtain a miner's certificate, from the Department in Quebec or from the nearest agent. The price of this certificate is $10.00, and it is valid until the first of January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.

The holder of the certificate may stake mining claims to the extent of 200 acres.

WORKING CONDITIONS.

During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.

SIX MONTHS AFTER STAKING.

At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.

MINING LICENSE.

The mining license may cover 40 to 200 acres in unsurveyed territory. The price of this license is Fifty Cents an acre per year, and a fee of $10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION.

Notwithstanding the above, a mining concession may be acquired at any time at the rate of $5.00 an acre for SUPERIOR METALS, and $3.00 an acre for INFERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land, where important mineralized belts are known to exist.

PROVINCIAL LABORATORY.

Special arrangements have been made with the POLYTECHNIC SCHOOL of LAVAL UNIVERSITY, 228 ST. DENIS STREET, MONTREAL, for the analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the Province, on application addressed to

HONORE MERCIER,
Minister of Colonization, Mines and Fisheries, Quebec.

S. Hyman Limited TOBACCONISTS

will be glad to welcome the Students at their three stores

To Investors

THOSE WHO, FROM TIME TO TIME, HAVE FUNDS REQUIRING INVESTMENT, MAY PURCHASE AT PAR

DOMINION OF CANADA DEBENTURE STOCK

IN SUMS OF $500 OR ANY MULTIPLE THEREOF.

Principal repayable 1st October, 1919.

Interest payable half-yearly, 1st April and 1st October by cheque (free of exchange at any chartered Bank in Canada) at the rate of five per cent per annum from the date of purchase.

Holders of this stock will have the privilege of surrendering at par and accrued interest, as the equivalent of cash, in payment of any allotment made under any future war loan issue in Canada other than an issue of Treasury Bills or other like short date security.

Proceeds of this stock are for war purposes only.

A commission of one-quarter of one per cent will be allowed to recognized bond and stock brokers on allotments made in respect of applications for this stock which bear their stamp.

For application forms apply to the Deputy Minister of Finance, Ottawa.

DEPARTMENT OF FINANCE, OTTAWA,
OCTOBER 7th, 1916.
